*Notes: in 2022 dollars, based on June-August average. Dollar figures are adjusted for inflation using Bureau of Labor Statistics Consumer Price Index (All Urban Consumers, All items in U.S. city average). Farmed salmon production is in live-weight equivalent, species: Atlantic, coho, Chinook. 4-yr. average = listed year and preceding three years; 4-yr. average price = inflation-adjusted ex-vessel value of listed year and preceding three years / harvest volume of listed year and preceding three years. Ex-vessel price and value for 2022 only reflects the base price, and does not include any other bonuses/adjustments.*
